

It required a long time before we secured a formula for a hair tonic that was good. It is our rule never to offer any preparation unless it has merit. This is what our Berlin Hair Restorer possesses. It is made from the formula of a German specialist who had devoted years to the study of the scalp. We had to pay a good price for it too, but he had the reputation. Now that our customers tell us how pleased they are with its results we are satisfied. We are confident you will find it better than anything you have ever used. We ask you to try it, and after using according to directions you find it has done no good, your money back. It's safe to use, not oily, and produces results. Price \$1.00.

HOBSON DRUG CO.

Do you see—perfectly—all that you might see?

Do you see easily—without strain, pain, eye or head aches?

If so be thankful, for few are so blessed in this day of defective eyes, with such perfect ones.

Otherwise—

We fit glasses by latest scientific methods, for the relief of eye strain, nerve drain, and the betterment of vision.

MIDSHIP SECTION OF THE NEW YACHT TO DEFEND AMERICA'S CUP

Gradually the lines of the America's cup defender are approaching the depth of the old cutters, from which the cup was won and which tried in vain for years to lift it. The vessel now building to make the defense of the America's cup this fall for the New York Yacht Club against Shamrock III, will be the deepest that has ever been used for the purpose. The midship section here given shows the lines of the hull of the vessel, which has not yet been named although there is a suggestion that the yacht will bear the title "Republican."

The lead keel of the defender will weigh 102 tons. The depth from the deck beams to the bottom of the lead keel is 25 feet 1/4 inch. This is more than three feet deeper than the Constitution. The new boat will have finer plating than the old yachts and the outlook is that she will be a better light weather boat. The vessel is being rushed along and when dropped into the

water will be rigged as quickly as possible, so that there will be all summer for tuning up. The new boat will have the Columbia, Constitution and Defender to race against in the preliminaries and will thus be as fast a ship as has ever been turned out of a shipyard if she takes the measure of that trio.

The Shamrock III is being put together as rapidly as possible and will be ready for sailing early in May. It is announced as the intention to send the yacht across the Atlantic in June, so that there will be plenty of time to tune up in the waters in which the race is to be sailed. The yacht will have the Shamrock II for a trial horse, and there will be a close study of the currents around the course off Staten Island, during the two months which will be devoted to the preliminaries. The picture given of the midship section of the new defender is the first authentic sketch permitted.

PUNAHOU GIRLS WIN AT BASKET BALL

Before an enthusiastic audience of several hundred people the Punahou girls basketball team defeated the Y. W. C. A. team with a score of nine points to six at Kamehameha School yesterday afternoon. The day was ideal, and the game took on considerable of a society nature. The crowd was rather evenly divided as far as sympathy went, though the college girls had the benefit of numerous student rooters, who encouraged them at every opportunity. The court on which the game was played was a new one to both teams, but notwithstanding the fact that it was also smaller than other courts, there were but few fouls.

Punahou won the toss and elected to defend the makal goal. Soon after the ball was put in motion Punahou fouled twice, but the Y. W. C. A. did not put the ball in the basket. The first foul by the Association however gave Punahou a chance, and Miss Hall placed the ball for a score of one. Soon after that she scored again, and for a few minutes it looked as though she would score a third time, but Miss Cruse for the Y. W. C. A. succeeded in scoring for her side. After a hard tussle and repeated efforts which brought forth much applause Miss Lucy Roth placed the ball in the basket, and for the first time the Association girls were ahead with a score of 4-3. This did not last long, for in close succession Miss Hall added four points and the first half ended with Punahou ahead, with a total of seven points to their opponents four.

In the second half Miss Lowrie replaced Miss Hill on the Punahou team, who retired on account of sickness. This half was fully as interesting as the first, and when Miss Cruse threw correctly, and brought the Association score to within one point of Punahou's score, the excitement was intense.

There were but a few minutes in which to play, and victory for any side could not be predicted. There was a chance for a lucky shot, and Miss Hall embracing a good opportunity, made the

nearest shot of the day, placing the ball fairly in the basket from a distance of fully twenty feet, amidst cheers from the Punahouites. The game soon ended, leaving the College victors of the season with two games to their credit.

Though the winners at times played brilliantly, the good work of the Association team must not be lost sight of. They played a steady consistent game throughout, but in the end the superior team-work of their opponents told. In the first half their forwards played well, facing a sun which beat blindingly directly in their faces. While the individual members in both teams played excellently, without a sign of shirking, Miss Hall for the Punahou, and Miss Cruse for the Y. W. C. A. team without doubt, carried off the honors of the day. But that they were able to do so, was only due to the good support which each received.

The following young ladies composed the teams and substitutes:
Punahou—Florence Hall (Capt.), Julie Damon, Violet Damon, Irene Fisher, Katherine Hannedsted, Florence Hill, Freda Gay, Lottie Marcellino.
Y. W. C. A.—Lucy Roth (Capt.), Irmgard Schaefer, Elsa Schaefer, Carlotta Stewart, Ethel Angus, Carrie Cruse, Belle Dickey and Miss Fraser.

Honolulu and Scotland Tie.

The vacant date in the Association football series yesterday was filled with a match between All Honolulu, the team being made up of stars from all League teams, and Scotland, a team composed of men from the fatherland. The teams were fairly matched but owing perhaps to the lack of League interest, the game was not up to the standard. The play was better on the defense and the ball was most of the time in the Scotland territory. The goal keepers were kept pretty busy and their work was of the highest class. The teams were unable to score throughout two fairly fast halves, the game ending with a tie.

Agnew After Weday.

Lon Agnew, since his return to the city, is said to be willing to take on Jack Weday for a return match. Lovers of the roped arena are doing their best to bring about a meeting and have not abandoned hope. The plan that is being talked of now is to have the men get together for ten rounds at catch weights, for gate receipts and a side bet of \$200. Many of his old friends insist that Agnew is in better shape than ever. Weday is considering the matter.

PALACE GRILL'S EXPERIENCE.

The Enormous Rush at Its Ben Butler Dinner.

Does advertising pay? The Palace Grill can answer, Yes. Last Sunday the Palace Grill advertised that it would furnish Ben Butler's famous dinner to its Sunday patrons. Preparations were made for more than twice the usual number of diners but instead of having that number more than seven times the usual number crowded in and the result was that the Grill was fairly swamped. The dinner was gone before half the patrons had been served and late comers had to depend upon short orders. The Grill never anticipated such a rush and consequently was not prepared for it. But it will be prepared today. It intends to give the Ben Butler dinner again this evening and there will be enough for all even if last Sunday's crowd should be doubled. Additional waiters have been engaged so that the service will be prompt and good and every body can go away satisfied and feeling that he has had his money's worth. The price will be the same, only fifty cents for the best dinner to be had in Honolulu.

Advertiser as a Library.

The High School of Goshen, Orange Co., N. Y., has been presented with copies of the special cable edition of the Advertiser, which were sent on by Mr. S. L. Rumsey, and have been found of such value, that, according to the Independent Republican of that city, they are now being used as first grade sources of information and reference.

FOUND A SKIRT OF HUMAN HAIR

The Hilo Tribune tells the following interesting story of the discovery in Kona of a number of rare Hawaiian relics:

"A report was brought in this week from Kona telling of some new and interesting discoveries in the caves in Kalamakua cliff. After much effort and no little danger, Sam Hall managed to gain entrance to a cave hitherto unexplored. Some rare tapas were found, many of which were in an excellent state of preservation. Calabashes of rare kou, and hula skirts made from human hair were brought forth to light from the tomb in which they had lain since the time of the early Kamehamehas.

"In one cave there was found an iron coffin. The lid had been removed and the occupant of the narrow house was gone. Old natives who were interviewed upon the discovery tell of a visit of King Kalakaua some years ago, when he entered these ancient burial places and removed the bones of some of the royal dead to the mausoleum at Honolulu. It is the opinion of these natives that the broken iron coffin once contained the remains of a close relative of either the first or second Kamehameha.

"In the cave which contained the tapas, there was also found the skirt made of plaited human hair, bracelets and anklets studded with white teeth, and gourds and many other rare and ancient curios. However, there was no sign that this cavern had been used as a burial place. After exploring this cavern, the daring cliff climbers scaled the side of the precipice, a distance of fifty feet, by means of a ladder. No important finds were made after this laborious climb. Some of these articles are now in possession of Senator J. D. Paris on whose lands the caves are located; but most of them were undisturbed in the gloom which had hidden them for decades."

Briquettes made with such cements as dextrin molasses, lin. flatted cellulose, or resinate of ammonia, have the fault of dissolving in water. A plan of making them waterproof has been devised by Richard Bock, a Saxon engineer, who simply heats the briquettes until carbonized, when they become quite insoluble. If the cement is liable to ignite the heating must take place in an air-tight case or by means of hot gases.
